

## ACS Strategic Communication Framework

Strategic communication is purposeful, informed, deliverable, and measurable. Thinking strategically about your organization’s communication will help you connect with your audience in a targeted way, use informed approaches to deliver your message, and achieve the maximum impact with respect to your capacity.

Through years of research and experience in the field, ACS learned there are multiple (sometimes non-sequential) steps to an effective communication process. Ideally, you would tackle each of these steps at some point in your communication approach. Some of these steps are more difficult or take more time to complete than others. Use this guide to answer focused questions to help you review context, plan, and implement an effective communication approach. Don’t forget to check out ACS’ additional resources and materials to help you along the way.
